Memorandum

TO

: AD/OEL

FROM	: DAD/S&D
SUBJECT	Cverrun - Task Order 15
25X1A	
25X1A 25X1A	The overrun of some is indicated as being against Task Order 15. Actually, the overrun is against Task Order 10 and 15. The missions against China were run under Task Order 10. This
25X1A	was approximately Task Order 15 was established for the Cuban operations at It appears to me that the bulk of the money expended in the overrun is actually increased scope of work properly done under Task Order 10.
	What this amounts to then is that we will show an overrun of approximately 60% on Task Order 15. Actually its increased scope of work on Task Order 10 and 15. The amount of the increase being something less than about 20%.
25X1A	I talked to about
25X1A	(1) Cutting the overrun up so that part of it is against Task Order 10 and part against Task Order 15. This appears to be unfeasible because Task Order 10 was let using FY64 money, was let in four parts and is expired at the end of August. You will note that Task Order 15 is expiring 15 November with an
	t have naked SMS to put all of their new work through
	I have asked SMS to put all of their new work through so that we can catch these sorts of things before we have lost our ability to take any alternate courses in funding. Both of these Task Order 10 and Task Order 15 should have been amended when the scope of work was increased.
